Slide 1

Hello everyone, we are ... and this is CSnippy

Slide 2

We saw that there was no easy way to view code snippets or a good way to compare code snippets. W3 schools is good but is a bit difficult

Slide 3

Our solution is to make a code snippet viewer that's easy

Slide 4

Developers who want an easy way to search snippets across multiple languages

New developers who want to learn about new languages or features

Slide 5

Some features we have are multiple languages, ways to search, and ways to compare snippets

Slide 6

Talk about languages and the cuts we had to make

Slide 7

Here is a record of the work we completed over the past four weeks of development and some metrics about our commit history.

Slide 8

[Demo]

Slide 9

Here is what we want for the future
